

India is not a country, but a home and waking up in India is like waking up to life itself. A place where every new day comes with new hope, new thought, new opportunity, new strength and new blessing.

It is seemingly impossible to amass India's greatness into words. From the ancient Vedic ages till today, the Indians have exhibited unmatchable deep understanding and mastery over knowledge across the spectrum. What sets us apart? From astronomy to metallurgy, mathematics to medicine, the contribution of Indians to the global knowledge discovery is enormous.

Undeniably this is incredible India which lives in several centuries at the same time. It is

- ...the land of Vedas and Gurukuls,
- ...the territory of aristocratic palaces and forts,
- ...the domain of fabulous wealth and infinite possibilities,
- ...the realm of splendour and grandeur,
- ...the kingdom of dreams and fantasies,
- and the country of myriad cultures and religions.

India's contributions to the world have been immense and diverse. The pages of this calendar delve deep into invaluable contribution of India and lead you to an incredible journey of India's rich and vibrant history, art, literature, science and spirituality.

# MEDICINE : COMPASSION CAN HEAL THE SUFFERING WHEEL

## AYURVEDA : THE SCIENCE OF LONGEVITY

Popularly known as the 'Science of Life', Ayurveda, one of the earliest medical sciences originated in ancient India, dates back to Iron Age India (1st millennium BC) and is still practiced today as a form of complementary and alternative medicine. Charaka, the father of medicine, consolidated Ayurveda 2500 years ago and since then it has evolved globally. Even the most advanced countries are now inclined to adopt the Ayurvedic System of medicine under various names like traditional medicine or herbal medicine. India has already signed agreements with countries like Bulgaria, Latvia, Russia, Chile, Spain, South Africa, Bangladesh and Malaysia to promote Ayurveda.

## SHASTRAKARMA : THE ART OF SURGERY

Cataract surgery was first found in ancient India and was performed with a curved needle used to loosen the lens and push the cataract out of the field of vision. These methods were later spread to the world. Sushruta, the father of surgery with health scientists of his time conducted complicated surgeries like cesareans, cataract, artificial limbs, fractures, urinary stones and even plastic surgery and brain surgery 2600 years ago.

### TAKSHASHILA UNIVERSITY : EXPERIENTIAL LEARNING SUPERSEDING POTENTIAL LEARNING

Confluence of culture with heritage, the University of Takshashila intrigued erudites from the Indian kingdoms as well as Babylon, Greece, China and Syria. This university not only taught Vedic texts and rituals but also different disciplines such as medicine, arts, linguistics, law, astronomy, reasoning, archery and astrology. Takshashila was listed by UNESCO as one of the world heritage sites in 1980.

### GURUKUL CULTURE : HIGHER EDUCATION FOR HIGHER CONSCIOUSNESS

A source of inspiration, an ancient Gurukul Education System imparted a comprehensive and all-encompassing education amidst the green and serene environs nurturing the multi-facets of each pupil's personality. Physical training was integral to learning along with yoga and meditation to keep the mind and soul in peace. People from Middle East, Europe and Portugal came to study at Gurukuls in India. India had 732000 Gurukuls at the time when the first school in England opened in 1811 .

# GAMES: DARING IDEAS START A WINNING GAME

## CHESS

A board game originated from Chaturanga an old Indian two-player board game that was invented at least 1,500 years ago in ancient India. The Arabians adapted it to a game they called shatranj, which was later embraced by the Europeans during the Medieval Period and, after a few modifications, is now known as chess.

## SNAKES & LADDERS (MOKSHA PATAM)

The childhood favourite Snakes and Ladders, has its origin in India and was called Gyan Chaupar or Mokshapat, used to teach Hindu values to children. The good deeds act like ladders to achieve heaven, whereas snakes symbolise sins and vices pushing one back into a cycle of re-births. The British took the game to England in 1892 and named it Snakes and Ladders.

## LUDO

Before it was called Ludo, it was a 4th-century Indian game called Chaupar/Chausar made out of cloth or jute finds its earliest evidence in the Mahabharat. In fact, this Indian board game was in high demand in other imperial courts of the world too.

# HEALTH: FITNESS TO HAPPINESS

## YOGA : THE SYMPHONY OF LIFE – FROM ANCESTRAL YOGA TO THE MODERN DISCIPLINE

Originated in India, yoga , the complete harmony of the body, mind, and spirit was developed by the Indus- Sarasvati civilization in Northern India over 5,000 years ago and spread all over the world. The word yoga was first mentioned in the oldest sacred texts, the Rigveda and its introduction to the West is credited to Swami Vivekananda who first advocated and disseminated the elements of yoga to the Western audience by describing yoga as a "science of the mind".

## MEDITATION : THE WARDEN OF SPIRIT AND SOUL

A geometric design holding a great deal of spiritual and ritual symbolism in Asian cultures. Mandalas are believed to represent different aspects of the universe and are used as instruments of meditation and prayer most notably in China, Japan, and Tibet. Swiss psychiatrist and psychoanalyst Carl Jung explored the psychological effects of mandalas to help reduce stress and introduced it in psychotherapy. Everything that shows up in mandala is a vehicle for your awakening.

# LANGUAGE: TREASURE VAULT OF KNOWLEDGE AND PRIDE

## VEDAS : PORTALS OF VEDIC HERITAGE

Known as the parents of humanity on the earth, Indian Vedas have given to the world the values of traditions, non-violence, religious tolerance, equality, unity and integrity of humankind. Vedas traced its roots to a period when there was a single universal language and no scripts. Concerned with the nature of the Divine, they are not restricted to one particular God or idea. Vedas advocate that there exists a deep-rooted relationship between matter and soul, the universe and living beings, which have answers to all worldly problems.

## SANSKRIT : A LEGACY OF PRISTINE CLARITY

"India was the mother of our race and Sanskrit the mother of Europe's language." – Will Durant

Absolutely perfect language by its own nature, Sanskrit is not limited only to the literature but also holds the privilege of being used in the technical field. According to the Forbes magazine, Sanskrit is the most suitable language for computer software. English words like Avatar, Cot, Karma, Loot, and Jungle etc. are derived from Sanskrit only. It is the primary language of somewhere between 5 to 30 million surviving texts, including the Constitution of India.

# ART: SPEECH OF STROKES

## WARLI ART : VISION IN EXPRESSION

An internationally acclaimed timeless tribal mural and folk art of India originated sometime in the Neolithic period between 2,500 BC and 3,000 BC uses a very basic graphic vocabulary: a circle, a triangle and a square. Warli Art revolves around the Mother Nature and gives more importance to nature and wildlife symbolizing the balance of the universe. Today, Warli art has come along a long way to be filtered into present fashion and design creations. Once a simple painting technique of a marginal Indian tribe, the Warli paintings have an international exposure by virtue of talented artists.

## MANDALA ART

A geometric design holding a great deal of spiritual and ritual symbolism in Asian cultures. Mandalas are believed to represent different aspects of the universe and are used as instruments of meditation and prayer most notably in China, Japan, and Tibet. Swiss psychiatrist and psychoanalyst Carl Jung explored the psychological effects of mandalas to help reduce stress and introduced it in psychotherapy. Everything that shows up in mandala is a vehicle for your awakening.

# BUSINESS & COMMERCE: FROM GALLET TO DIGITAL WALLET

Citadel of capital and pivot of money market, Indian Stock Exchange provides necessary mobility to capital and directs the flow of capital into profitable and successful enterprises. The Bombay Stock Exchange (BSE) in Mumbai is Asia's first stock exchange and the world's fastest stock exchange with a median trade speed of 6 microseconds. Foreign entities and individuals can gain exposure to Indian stocks through institutional investors.

As an open market economy with adequate investment opportunities in various sectors including infrastructure, retail, defense, finance and insurance, information technology, and manufacturing, India's revolutionizing role in global business cannot be overlooked which reflects a positive trend between the Indian economy and international business. India definitely stands as an opportune place to explore business possibilities that facilitate the flow of talent, ideas, technology, business opportunities and investment capital.

By tapping into India's rich tapestry of talent, ideas, technology, and investment capital, businesses can unlock a world of possibilities and drive transformational growth and development.

# PRODUCTION TECHNOLOGY: SELF RELIANCE TO GLOBAL ALLIANCE

India's signature fabric, **Khadi** is a symbol of textile heritage. By medieval era, hand-woven Indian muslin was in great demand across the world for its fine translucent quality.

India taught the world to cultivate **Jute** and also exported raw jute to the western world, where it was used to make ropes and cordage.

The process of producing **crystallized sugar** from sugarcane was discovered by the time of the Imperial Guptas, and the earliest reference of candied sugar comes from India. Chinese documents confirm two missions to India, for obtaining technology for sugar-refining.

According to the Gemological Institute of America, up until 1896, India was the only source for **diamonds** to the world.

In ancient times, **commodities** like palm oil, coconut oil, cotton cloth, clarified butter, dyes, perfumes like sandalwood oil, musk tamarind, camphor, cast iron, tin sheets, copper vessels ,and even crude glass crockery were being exported from India.

# MATHEMATICS : INTRIGUING BLEND OF LOGIC AND COMPLEXITY

Synonymous with the poetry of logical ideas and music of reason, mathematics is a voyage from Complication to implication and from Irrationality to logicality. Ancient Indian mathematicians have contributed immensely to the field of mathematics which emerged in the Indian subcontinent from 1200 BCE until the end of the 18th century. As well as giving the concept of zero, Indian mathematicians made seminal contributions to the study of trigonometry, algebra, arithmetic and negative numbers among other areas. The number system and the decimal system used worldwide today was invented by Indians.

Aryabhatta, one of the greatest mathematicians worked on the 'place value system' and Srinivasa Ramanujan contributed in continued fractions, partial sums and products of hyper geometric series etc. The value of pi was first calculated by Budhayana, who explained the concept of what is now known as the Pythagorean Theorem. The Indians taught how to count, without which no worthwhile scientific discovery could have been made.

# TECHNOLOGY: IMAGINATION TO INNOVATION

Playing the catalyst for tech innovation across the world, India is serving as an innovation powerhouse of the world. The Indian technology industry today has a presence in over 100 countries and draws on employees of over 150 nationalities. As per the Global Innovation Index 2021 ranking, India is the top innovative country in central and south Asia and holds the record for over-performing on innovation relative to its level of development for the 11th year in a row.

This trend is also reflected in the number of patents filed by Indian domiciled companies in the West, mostly in the field of emerging technologies. India has also witnessed exponential growth in the spectrum of technology and application areas covered under organizations like ISRO (Indian Space Research Organization) technology transfer which includes telecommunications, computer systems (hardware and software), electronics, optics, and optoelectronics, chemical and polymers, and other special materials. India is the first nation in the world to successfully put the Mars Orbiter Mission (MOM), also called Mangalyaan into orbit in its very first attempt.

# ASTRONOMY: JOURNEY BEYOND THE HORIZON

Unearthing the secrets of the Earth, space, time, Indian scholars recorded Astronomical facts centuries before they were 'discovered' by Westerns. The oldest mention of astronomy in India dates back to second millennium BC and has been found in the Vedas. Some of the earliest roots of Indian astronomy can be dated to the period of Indus Valley Civilization or earlier.

Indian astronomy flowered in the 5th–6th century, with Aryabhata and other astronomers who have been credited with postulating certain fundamental principles of Astronomy including the Helio-centric concept of rotation of Earth around the Sun, prediction of lunar and solar eclipse, concept of gravitational force and mathematics of planetary motion contributing to our understanding of the Modern Astronomy and the methods of Celestial Mechanics used in Space Programmes. The art of Navigation was born in the river Sindh 6000 years ago. India is a proud home to many inventions and contributions that have changed the face of astronomy owing to excellent space scientists who relentlessly pushed the boundaries.

# ENTERTAINMENT: REEL TO REAL CELEBRATION OF MOVING IMAGES

'From Verse to Vision to Recreation' holds true for Indian Cinema, a powerful means of communication, a mirror of society and a cultural agent of change is the largest in the world in terms of number of movies produced every year in 25+ languages i.e. 1600 to 1800. It has entertained and influenced people across the spectrum in places as diverse as Jakarta, New York, Tokyo and Mumbai. Several movies based upon the lives of the renowned personalities hold immense educative value and prove to be a mode of motivation and inspiration for people. Thanks to Indian cinema, Indian festivals like Holi and Deepawali, have become familiar terms to foreign audiences. Indian artists make their presence felt in foreign shores either by acting in foreign films, or by being a part of the jury at prominent film festivals such as Cannes Festival in France.

RRR's catchy number 'Naatu Naatu' created history at the Oscars and the triumph of 'Elephant Whispers' is testimony to amplify India's global communication on diversity and inclusion and thereby further enhancing soft power of Indian cinema in unique ways.

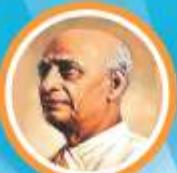

### शहीद भगत सिंह

हमारे विचार तथा  
मानसिक विकास  
अधिकांशतः आर्यसमाज  
की देन है।

### सरदार वल्लभभाई पटेल

भारत की स्वाधीनता की नींव  
रखने वाले वास्तव में स्वामी  
दयानन्द ही थे।

### वीर सावरकर

महर्षि दयानन्द  
स्वाधीनता संग्राम के  
सर्वप्रथम योद्धा थे।

### श्यामजी कृष्ण वर्मा

मैंने राष्ट्र, जाति और  
समाज की जो सेवा की  
है, उसका श्रेय महर्षि  
दयानन्द को जाता है।

### लाला लाजपत राय

स्वामी दयानन्द मेरे गुरु हैं। उन्होंने  
हमें स्वतंत्रतापूर्वक विचारना, बोलना  
और कर्तव्यपालन करना सिखाया।

महर्षि दयानन्द | जयन्ती  
सरस्वती | 1824–2024

### लोकमान्य तिलक

स्वराज्य और स्वदेशी का सर्वप्रथम  
मंत्र प्रदान करने वाले जाज्ञव्यमान  
नक्षत्र थे – दयानन्द।

### लाल वहादुर शास्त्री

राजकीय क्षेत्र में अभूतपूर्व कार्य करने  
वाले महर्षि दयानन्द महान राष्ट्रनायक  
और क्रान्तिकारी महापुरुष थे।

### सुभाष चन्द्र बोस

आधुनिक भारत के  
आद्यनिर्माता तो  
दयानन्द ही हैं।

### स्वामी श्रद्धानन्द

सत्य को ही अपना  
ध्येय बनायें और  
दयानन्द को अपना  
आदर्श बनायें।

### रवींद्रनाथ टैगोर

मेरा सादर प्रणाम उस महान  
गुरु को, जिनकी दृष्टि ने भारत  
के आध्यात्मिक इतिहास में सत्य  
और एकता के दर्शन किए।

### दादाभाई नवरोजी

मुझे स्वतंत्रता संग्राम में  
सर्वाधिक प्रेरणा महर्षि  
के ग्रंथों से मिली है।
